Team

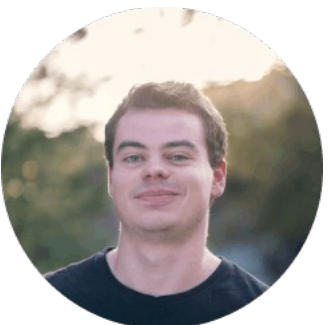

Frieder Hansen, Co-Founder, CEO

Frieder saw the need for an alternative approach to digitalize work processes in an efficient and secure way. To close this huge digitalization gap, he founded Infrafon 2021, leaving Pyramid Computer with an IPO after 35 years.

Brian Wyld, Co-Founder, CTO

After decades of telecom industry experience at HP, Kerlink, as well as successful sales of his own two companies Wyres and Eloquant, Brian met Frieder at MWC Barcelona. He declared his idea as crazy and decided to join as CTO.

Christian Stanke Marketing

Christian joined Infrafon in the summer of 2021 as a working student. He is responsible for marketing and project management.
